OBJECTIVE

Computer Science student graduating May 2027 seeking a SOC Analyst role, bringing hands-on project experience in incident response, networking and security monitoring using Linux, SIEM, MITRE ATT&CK, Python, Docker, Claude API, PostgreSQL and FastAPI.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Bash
Frameworks and Tools: Linux, Docker, FastAPI, Next.js, React, PostgreSQL, Git, GitHub Actions
Security and AI: Networking, SIEM, MITRE ATT&CK, Incident response, Log analysis, Wazuh, OWASP Top 10

PROJECTS

LogSentry, LLM-Assisted Alert Triage | Python, FastAPI, PostgreSQL, Wazuh, Claude API, Docker Jan 2026 to Apr 2026

- Built a FastAPI service that ingests Wazuh alerts into PostgreSQL and groups 2,000+ daily events into incidents.
- Mapped alert rules to MITRE ATT&CK techniques and used the Claude API to draft triage notes for analyst review.
- Packaged the stack with Docker Compose and wrote Bash scripts to replay sample logs for testing.

PhishGuard, Phishing URL Classifier | TypeScript, Next.js, FastAPI, scikit-learn, PostgreSQL Sep 2025 to Dec 2025

- Trained a scikit-learn classifier on 40,000 labeled URLs and served predictions through a FastAPI endpoint.
- Built a Next.js dashboard with Tailwind CSS and deployed it on Netlify with GitHub Actions CI and pytest checks.
- Reviewed the app against the OWASP Top 10 and fixed input validation and rate limiting gaps.

EXPERIENCE

IT Support Co-op | Example Credit Union May 2025 to Aug 2025

- Resolved 300+ hardware, network and account tickets for 150 staff across three branches.
- Wrote Python and Bash scripts to automate Linux workstation setup, cutting setup time from 2 hours to 30 minutes.

EDUCATION

Bachelor of Science, Computer Science | Example University Sep 2023 to May 2027

CERTIFICATIONS

CompTIA Security+ (2025)
